## IceDozer Attacks Windshield Ice Three Ways

Innovation Factory has created the IceDozer, an ergonomic ice scraper to clear windshields during winter weather. It features the patented FlexiBlade, which automatically adjusts to the curvature of any windshield, according to the company. With an ergonomic grip and triple attack surfaces, the scientifically designed IceDozer makes quick work of windshield ice.

The product's multiple attack surfaces won't scratch glass, and will scrape away the different types of ice buildup. The FrostPeeler Blade quickly peels away annoying morning frost, while the forward facing IceBreaker Teeth provide a cracking force to plow through thicker ice. Lastly, the Tenderizer Teeth are used to create fissures in really thick ice and then used to rip apart the broken debris.

## Easy Quick Jumper Charges Battery in 5 Minutes

The Easy Quick Jumper by Wagan can charge a dead battery in five to 10 minutes without the driver having to open the hood of the car. Drivers are able to charge the battery using the vehicle's 21V power socket. Simply plug the short cord in to the running vehicle's power outlet, then plug the extra long 18-foot cable into the car with the dead battery and wait for the Easy Quick Jumper's LED light to turn green indicating the car should have enough "juice" to start. According to the company, anyone can use this easy and safe product.
