

NEW PRODUCT

Mug warms drink in car and at desk

A new mug on the market comes equipped with plugs that enable the device to keep the drink inside warm, whether the user's on the go or hard at work.

A 16 ounce heater mug from

Princess International Inc. comes with a car lighter adapter cord to draw heat from the auto's battery, as well as a USB cord that takes energy from a computer.

Made of stainless steel, the handled mug features a rubberized exterior finish. The mug also comes with a spill-proof, press-on lid with a thumb slide. The mug comes in red, black or blue.

The device retails for \$19.99.
