

GARDENING

Let there be light . . . and dark

Lighting adds charm to any garden or patio space, but it can be a hassle to turn lights on and off.

Remote Controlled Power Outlets — \$11.99 with timer and \$10.50 without — control outdoor lights, along with outdoor appliances, with the touch of a button. You don't have to leave the house.

The remote control transmits a signal up to 40 feet. It works in any standard outlet to control appliances, security systems or lighting. Look for Remote Controlled Power Outlets at www.cableorganizer.com.
