CableOrganizer.com's Secret Weapon Helps Engine Bay Cables Stay Cool While Looking Car-Show Hot

ConvoShield™ wire loom deflects heat and RFI while adding an eye-popping chrome glow to custom cars.

Fort Lauderdale, FL, May 3, 2011 – As long as you're taking the time to organize and add some heat protection to the engine cables of your car, truck or motorcycle, you might as well make them turn heads while you're at it. Get both jobs done with a single secret weapon: ConvoShield™ by Bentley-Harris, a chrome-look wire loom that protects engine bay wire harnesses and hoses from high temps and abrasion while cranking their style factor through the roof.

"When you're dealing with aftermarket car tuning accessories, specialty looms like ConvoShield™ AL are one of the easiest and least expensive products for adding a custom look to your engine bay," notes Christina Hansen, a Product Specialist with CableOrganizer.com. "If you want to protect your engine connections and get the same high-shine chrome 'pop' that you see at car shows, ConvoShield™ is definitely the way to go."

ConvoShield™ AL was specifically designed with radiant heat environments, like engine compartments, in mind. Constructed of nylon copolymer with a super reflective, chrome-finish aluminum coating, ConvoShield™ AL (<http://cableorganizer.com/convoshield/>) is suited to extreme temperatures, whether hot or cold. Testing has shown this product to withstand temperatures of up to 1000°F (500°C) for a full hour without distorting, yet ConvoShield™ is also able to maintain its flexibility when temperatures dive down to -40°C.

From gasoline and brake fluid to motor oil and antifreeze, vehicles are full of chemicals and substances that threaten to corrode the wires and cables they come into contact with. ConvoShield™ AL provides excellent resistance to a wide range of automotive fluids, and its aluminum coating also helps shield cables against Radio Frequency Interference (RFI).

CableOrganizer.com offers a wide variety of specialty wire looms and corrugated tubing for automotive, marine, aerospace and telecom applications, available at <http://cableorganizer.com/wire-loom/>.

About CableOrganizer.com
